

Croton-Harmon Shop Tour

Saturday, April 22, 2017

A behind-the-scenes look at one of the newest, most state-of-the-art railroad maintenance facilities in the U.S.

The Electric Railroaders' Association is pleased to announce a tour of the Croton-Harmon Shop on April 22.

The Croton-Harmon Shop, located in Croton-on-Hudson, is one of MTA Metro-North's major rail maintenance complexes. It was built in the early 1900s for the New York Central Railroad and serves a variety of Hudson Line rolling stock including M8s, M7s, diesel locomotives and more. The facility received a major renovation in 2010 which included the addition of three new equipment maintenance facilities, expanded train storage capacity and extensive upgrades to their maintenance equipment. One such upgrade was the addition of the first wheel truing machine in North America with the ability to service two sets of wheels at once. Croton-Harmon is now so advanced that it even won an international Brunel Award in 2011 for outstanding visual design in railway transportation.
