

ELECTRIC RAILROADERS' ASSOCIATION, INC.  
**CONVENTION**

**NEW YORK CITY**

**JULY - 3-4-5**

The 1976 Convention will be held in New York City over the July 3rd thru 5th weekend. It was necessary, once again, to postpone visiting San Francisco as the Boeing LRV's will not be on hand. However New York City is an ideal location for a convention with so very much electric railroading possible. A full and interesting program is being prepared and full details will follow as they are available. We can however, announce that one of the excursions will be on the Hudson and Harlem Divisions running from Grand Central Terminal using ex-New Haven Railroad "washboard" 4400 series coaches with a 1906 ex-New York Central "S" motor on the point! MU cars being hauled by one of the all time classic electric locomotives! Reserve these dates and plan to attend what will be a truly memorable weekend.
